

Accessories

## Segway 12.0 Handlebar Bag

Kit Number: 1736800001

### Contents

- 1 Segway™ 12.0 Handlebar Bag

**No tools required**

### WARNING

Do not carry more than 10 lbs. (4.5kg) of cargo in this bag. Carrying excess weight could damage your bag and/or your Segway HT and render them unsafe to use.

Carrying cargo in this bag (or attached to the handlebar in any other manner) will change the behavior of the Segway HT. The greater the weight, the more the change. You should acquaint yourself with these changes while riding at slow speeds. Never let go of a Segway HT in Balance Mode, because the Segway HT will travel some distance on its own, risking injury or damage.

## > Instructions for Installation of Handlebar Bag

### Step 1

The Segway 12.0 Handlebar Bag has two handles. While holding one of the handles in each hand, place the bag above the handlebar with the large volume compartment facing forward. (see picture)

### Step 2

Wrap the control shaft cuff around the control shaft and engage the hook and loop closure.

### Step 3

Drape the bag over the handlebar so that the large volume compartment is forward and the back flap with pockets is facing the rider platform. Align the bag so that the display and key port are centered within the handlebar window.

### Step 4

Press the back flaps against the back of the large volume compartment to engage hook and loop closures. Pull the side tabs around the back flaps and engage the hook and loop closures. Adjust the control shaft cuff if necessary.

**LIMITED WARRANTY** The Segway 12.0 Handlebar Bag is an accessory covered by the Segway™ Human Transporter Limited Warranty (copy delivered with this kit).

### Questions?

If you are missing a part, or if you need to return the product, please contact Segway Customer Service at 866.4SEGWAY (866.473.4929) or [www.segway.com/support/contact\\_us.html](http://www.segway.com/support/contact_us.html). Thank you.
